

Paasche VL Dual Action Airbrush

The Paasche VL airbrush is the best all around airbrush for spray tanning and temporary airbrush tattoos. When using other airbrushes other than the Paasche VL, always check the return policy of the store where you purchased the unit. Many salons use other airbrushes; however, the Paasche VL is the most versatile. This airbrush can be purchased on our website as well as other places either locally or on-line.

Compressor

When selecting a compressor, we recommend finding your best deal. The unit above is a standard, low cost, compressor that can be purchased at Wal-Mart. This type compressor meets the minimum requirements for spray tanning and airbrush tattoos, however, when selecting a compressor, bigger is better. Belt drive compressors are always quieter than direct drive. A compressor can also be located far enough from the room to dampen the noise.
