---

Thank you for your Olive Branch Skin Care, Inc. Two Week Ink purchase. We consider it a privilege to have you as a customer. If there is anything we can do to help you, please don't hesitate to contact our offices.

In order to achieve maximum duration of Two Week Ink airbrush tattoos, follow these simple steps:

1. Clean the area of the skin with rubbing alcohol.
2. Lightly attach stencil to the skin. (Follow stencil maker guidelines.)
3. Spray a light first coat of tattoo ink.
4. Apply baby powder to the ink with a brush to set the ink. Dust off excess.
5. Repeat steps 3 and 4 for 3 coats to achieve total coverage.
6. Carefully remove stencil.
7. **Clean up ink with Denatured Alcohol. (The ink is waterproof!)**
8. Ink may be thinned with denatured alcohol, when necessary.

Remember that tattoo placement is critical to the duration. A tattoo that is applied to the lower back at the pants line will rub off sooner than if it is placed just above the pants line. A tattoo placed on an adult will last longer than on a child due to the rapid exfoliation of children. Tattoo Extender, available on our website, can be used to extend the life of a tattoo almost indefinitely when used correctly. We don't recommend extending a tattoo more than a few weeks in order for the skin to breathe.

Our ink was developed in our lab from the ground up and is unlike any other temporary tattoo ink in America. Therefore, our formulation is a closely held secret and is for professional use only. Rest assured that we only use ingredients that are FDA approved for the skin. Larger sizes are available on our website.

Please let us know if you have any questions. Thank you and good luck.
